DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Zapien et al (of record, IDS of 8-6-03). Zapien et al teaches a spectral ellipsometer having a refractive illuminating optical system for an illuminating ray bundle, coming from an illumination unit, for generating a measurement spot on a surface of a specimen (see Fig. 1 and explanation); and a detector unit that receives and detects, as a measured ray bundle, the light reflected from the surface at the location of the measurement spot, where the illuminating optical system is color-corrected (page 17, col. 1, lines 7-8) and where a receiving optical system that is color-corrected (page 17, col. 1, lines 13-15) is provided for the measured ray bundle. Note, that the range could be from 1.5 to 6.5 eV (see page 17, first and second columns) that would include a spectral range from approximately ultraviolet to approximately infrared.

Application/Control Number: 09/893,709

Art Unit: 2873

Claim R jections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-4 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zapien et al in view of Hecht (of record, IDS of 8-6-03). Zapien et al is cited for reasons set forth above against claims 1 and 5, but Zapien et al does not teach a specific construction of a color corrected, achromatic doublet or triplet. Hecht teaches on pages 232-238, the different types of achromatic optical systems (doublets and triplets) as well as the recited materials of making them. It would have been obvious to one of ordinary skill in the art to make the color corrected optical system of Zapien et al in the specific manner taught by Hecht, since this is the, literally, textbook manner of providing color correction in an optical system that requires it.

Response to Arguments

Applicant's arguments filed April 15, 2004 have been fully considered but they are not persuasive. Applicants argue that Zapien et al discloses only a UV achromat objective and could not be color-corrected over a spectral range from approximately ultraviolet to approximately infrared as recited in claims 1 and 5.

Application/Control Number: 09/893,709

Art Unit: 2873

However, the Examiner points out that even if Zapien et al only corrects at two points within the claimed range (as Applicants argue), it still meets the recited language "...color-corrected over a spectral range from approximately ultraviolet to approximately infrared...".

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott J. Sugarman whose telephone number is (571)272-2340.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
